

Target Market Determination

Prime Value Emerging Opportunities Fund – Class B Units

Issued: 19 January 2024
 (TMD Version 1)

This Target Market Determination (**TMD**) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). It sets out the class of consumers for whom the Prime Value Emerging Opportunities Fund – Class B Units, including its key attributes, would likely be consistent with their likely objectives, financial situation and needs. Distributors must take reasonable steps that will, or are reasonably likely to, result in distribution of the product being consistent with the most recent TMD (unless the distribution is excluded conduct).

This document is **not** a product disclosure statement and is **not** a summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the Product Disclosure Statement (**PDS**) for Prime Value Emerging Opportunities Fund – Class B Units before making a decision whether to buy this product.

Important terms used in this TMD are defined in the Definitions at the end of this document. The PDS for the product can be obtained at <https://primevalue.com.au/resources/product-information/emerging-opportunities-fund> or by calling Prime Value +61 03 9098 8088.

Description of Target Market

TMD indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red and green rating methodology with appropriate colour coding:

In target market	Not in target market
------------------	----------------------

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers who are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in Column 1 is likely to be in the target market for this product.

Appropriateness

Prime Value Asset Management has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market, as the features of this product in Column 3 of the table below are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (for example, with an intended product use of *minor allocation* or *core component*). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a balanced or moderate diversified portfolio with a *minor* allocation to growth assets. In this case, a product with a *High* risk/return profile may be consistent with the consumer's objectives for that *minor* allocation notwithstanding that the risk/return profile of the consumer as a whole is *Medium*. In making this assessment, distributors should consider all features of a product (including its key attributes).

Target Market Summary

This Fund is intended for use as a **Minor** or **Satellite** allocation within a portfolio for a consumer who is seeking **Capital Growth** and has a **High** or **Very High** risk/return profile for that portion of their investment portfolio. It is likely to be consistent with the financial situation and needs of a consumer with a **3 year or more** investment timeframe and who is unlikely to need access to capital within **two to three Business Days of request**.

Consumer Attributes <i>(A description of the likely objectives, financial situation and needs of the class of consumers in the target market)</i>	TMD Indicator	Product description including key attributes <i>(A description of the product, including its key attributes, i.e., product terms, features and attributes that affect the TMD)</i>
Consumer’s investment objective		
Capital Growth	In target market	The Fund is designed for investors seeking medium - long term capital growth who are prepared to accept fluctuations in short-term returns. The Fund will be comprised of securities, primarily companies listed on an Australian stock exchange outside the ASX100 index, with an emphasis on capital preservation. The Fund aims to pay income half-yearly as at 30 June and 31 December. However, there is no guarantee that the Fund will be able to pay income in the future in any particular distribution period and the level of any income may vary materially from one distribution period to the next.
Capital Preservation	Not in target market	
Income Distribution	Not in target market	
Consumer’s intended product use <i>(As percentage of assets available for investment excluding family home)</i>		
Solution/Standalone (75-100%)	Not in target market	The Fund will be comprised of securities, primarily companies listed on an Australian stock exchange outside the ASX100 index, with an emphasis on capital preservation.
Major allocation (up to 75%)	Not in target market	
Core Component (up to 50%)	Not in target market	

Consumer Attributes <i>(A description of the likely objectives, financial situation and needs of the class of consumers in the target market)</i>	TMD Indicator	Product description including key attributes <i>(A description of the product, including its key attributes, i.e., product terms, features and attributes that affect the TMD)</i>
Minor allocation (up to 25%)	In target market	<p>The Fund’s portfolio of securities will be as follows:</p> <ul style="list-style-type: none">ASX listed and other exchange listed Australian securities0% - 100%Unlisted Australian securities0% - 20%Global listed securities0% - 20%Cash0% - 20% <p>The Fund can use derivatives for risk management purposes.</p> <p>Prime Value will endeavour to work within the above guidelines, however, these should be viewed as objectives only and not absolute limits.</p> <p>The Fund has set the S&P/ASX Small Industrials Accumulation Index as its benchmark.</p> <p>As the Fund provides exposure to primarily companies listed on an Australian stock exchange outside the ASX100 index, with a typical number of stocks between 25 and 50, its portfolio diversification has been assessed as ‘Medium’.</p> <p>Please refer to the Definitions section of this TMD.</p>
Satellite allocation (up to 10%)	In target market	
Consumer’s investment timeframe		
Minimum investment timeframe	The minimum suggested time frame for holding an investment in the fund is 3 years or more.	
Consumer’s Risk (ability to bear loss) and Return profile		
Low	Not in target market	<p>As the Fund is estimated to experience 6 or 7, or greater negative, annual returns over any given 20-year period, it has been assigned a Standard Risk Measure (SRM) of 6 or 7, which equates to ‘High’ or ‘Very High’.</p>
Medium	Not in target market	
High	In target market	<p>As such, the Fund is designed for consumers who:</p> <ul style="list-style-type: none">have a more aggressive or high/very high-risk appetite,
Very High	In target market	

Consumer Attributes <i>(A description of the likely objectives, financial situation and needs of the class of consumers in the target market)</i>	TMD Indicator	Product description including key attributes <i>(A description of the product, including its key attributes, i.e., product terms, features and attributes that affect the TMD)</i>
Extremely High	Not in target market	<ul style="list-style-type: none"> • seek growth or high growth assets, • are seeking to maximise high returns over the medium to long term, and • can accept higher potential losses.
Consumer's need to access capital		
Within one week of request	In target market	<p>Under normal circumstances, withdrawals will generally be accepted and processed daily. Withdrawal requests received before 3.00pm (Melbourne time) on a Business Day will be processed at the withdrawal price at the close of business on that day (subject to the below). Withdrawal requests received after 3.00pm will be processed using the withdrawal price for the following Business Day (subject to the below). Subject to the Fund being liquid, withdrawals are generally processed daily and paid within two to three Business Days of request</p> <p>However, in certain circumstances, such as when there is a suspension on redemptions or where the Fund becomes illiquid (as defined in the Corporations Act), unit holders may not be able to withdraw their investment within the usual period and alternative withdrawal procedures may apply.</p>
Within one month of request	In target market	
Within three months of request	In target market	
Within one year of request or more	In target market	

Distributor Information

The following section is for Distributors only.

Distribution conditions and restrictions

The Fund can be distributed:

Distribution Channel	Distribution Conditions and Rationale
Directly (and non-advised)	Retail and wholesale investors may obtain the PDS and TMD via Prime Value's website and apply to invest directly. Direct investors must read the PDS and complete screening questions during the application. These questions may be used to restrict access to certain products if the issuer cannot determine that the consumer is likely to be within the target market.
Directly (via an Adviser)	Retail investors may be recommended the product under an authorised financial advice provider. In making the recommendation, the advice provider must consider the investor's individual circumstances and comply with the best interests' duty and related obligations under the Corporations Act.
Investment or super platforms or wrap products (Platforms) or investor-directed portfolio service (IDPS)	Only available for distribution through a Platform or IDPS if the Platform or IDPS provider has an arrangement with Prime Value governing their relationship with Prime Value. The issuer of each Platform or IDPS has its own obligations as an issuer/distributor to take reasonable steps that will or are likely to result in retail product distribution being consistent with this TMD.

Distributor Reporting Requirements

Please send all DDO reporting to info@primevalue.com.au.

Reporting requirement	Reporting period	Which distributors this requirement applies to
Complaints relating to the product design, product. The distributor should provide all the content of the complaint, having regard to privacy.	As soon as practicable but no later than 10 business days following end of calendar quarter.	All distributors
Significant dealing outside of target market. See Definitions for further detail.	As soon as practicable but no later than 10 business days after distributor becomes aware of the significant dealing.	All distributors

Review

Review triggers
Material change to key attributes, fund investment objective and/or fees.
Material deviation from benchmark / objective over sustained period.
Key attributes have not performed as disclosed by a material degree and for a material period.
Determination by the issuer of an ASIC reportable Significant Dealing.
Material or unexpectedly high number of complaints (as defined in section 994A(1) of the Act) about the product or distribution of the product.
The use of Product Intervention Powers, regulator orders or directions that affects the product.

Mandatory review periods	
Review period	Maximum period for review
Initial review	1 year and 3 months from date of issue – 19 April 2025
Subsequent review	2 years and 3 months from date of issue – 19 April 2027

Definitions

Term	Definition
Consumer's investment objective	
Capital Growth	The consumer seeks to invest in a product designed to generate capital return over the investment timeframe. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product designed or expected to have low volatility and minimise capital loss. The consumer prefers exposure to defensive assets that are generally lower in risk and less volatile than growth investments (this may include cash or fixed income securities).
Income Distribution	The consumer seeks to invest in a product designed or expected to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (this may include high dividend-yielding equities, fixed income securities and money market instruments).
Consumer's intended product use (% of Investable Assets)	
Solution/Standalone (up to 100%)	The consumer may hold the investment as up to 100% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least Very High <i>portfolio diversification</i> (see definitions below).
Major Allocation (up to 75%)	The consumer may hold the investment as up to 75% of their total <i>investible assets</i> . The consumer is likely to seek a product with at least High <i>portfolio diversification</i> (see definitions below).
Core Component (up to 50%)	The consumer may hold the investment as up to 50% of their total <i>investable assets</i> . The consumer is likely to seek a product with at least Medium <i>portfolio diversification</i> (see definitions below).
Minor Allocation (up to 25%)	The consumer may hold the investment as up to 25% of the total <i>investable assets</i> . The consumer is likely to seek a product with Low <i>portfolio diversification</i> (see definitions below).
Satellite (up to 10%)	The consumer may hold the investment as up to 10% of the total <i>investable assets</i> . The consumer is likely to seek a product with Very Low <i>portfolio diversification</i> (see definitions below).
Investable Assets	Those assets that the investor has available for investment, excluding the residential home.
Portfolio diversification (for completing the key product attribute section of consumer's intended product use)	

Term	Definition
Note: exposures to cash and cash-like instruments may sit outside the diversification framework below.	
Very Low	The product provides exposure to a single asset (for example, a commercial property) or a niche asset class (for example, minor commodities, crypto-assets or collectibles).
Low	The product provides exposure to a small number of holdings (for example, fewer than 25 securities) or a narrow asset class, sector or geographic market (for example, a single major commodity (e.g. gold) or equities from a single emerging market economy).
Medium	The product provides exposure to a moderate number of holdings (for example, up to 50 securities) in at least one broad asset class, sector or geographic market (for example, Australian fixed income securities or global natural resources).
High	The product provides exposure to a large number of holdings (for example, over 50 securities) in multiple broad asset classes, sectors or geographic markets (for example, global equities).
Very High	The product provides exposure to a large number of holdings across a broad range of asset classes, sectors and geographic markets with limited correlation to each other.
Consumer's intended investment timeframe	
Minimum timeframe	The minimum suggested timeframe for holding the product. Typically, this is the rolling period over which the investment objective of the product is likely to be achieved.
Consumer's Risk (ability to bear loss) and Return profile	
<p>This TMD uses the Standard Risk Measure (SRM) to estimate the likely number of negative annual returns for this product over a 20 year period, using the guidance and methodology outlined in the Standard Risk Measure Guidance Paper For Trustees (note the bands in the SRM guidance differ from the bands used in this TMD). However, SRM is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return (including under conditions of market stress) or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. The SRM methodology may be supplemented by other risk factors. For example, some products may use leverage, derivatives or short selling; may have liquidity or withdrawal limitations; may have underlying investments with valuation risks or risks of capital loss; or otherwise may have a complex structure or increased investment risks, which should be documented together with the SRM to substantiate the product risk rating.</p> <p>A consumer's desired product return profile would generally take into account the impact of fees, costs and taxes.</p>	
Low	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a conservative or low risk appetite,

Term	Definition
	<ul style="list-style-type: none"> • seeks to minimise volatility and potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)), and • is comfortable with a low target return profile. <p>The consumer typically prefers stable, defensive assets (such as cash).</p>
Medium	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a moderate or medium risk appetite, • seeks low volatility and potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)), and • is comfortable with a moderate target return profile. <p>The consumer typically prefers defensive assets (for example, fixed income).</p>
High	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a high risk appetite, • can accept high volatility and potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 5 or 6)), and • seeks high returns (typically over a medium or long timeframe). <p>The consumer typically prefers growth assets (for example, shares and property).</p>
Very high	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has a very high risk appetite, • can accept very high volatility and potential losses (e.g. has the ability to bear 6 to 7 negative returns over a 20 year period (SRM 6 or 7)), and • seeks to maximise returns (typically over a medium or long timeframe). <p>The consumer typically prefers high growth assets (such as high conviction portfolios, hedge funds, and alternative investments).</p>
Extremely High	<p>For the relevant part of the consumer's portfolio, the consumer:</p> <ul style="list-style-type: none"> • has an extremely high risk appetite, • can accept significant volatility and losses, and • seeks to obtain accelerated returns (potentially in a short timeframe). <p>The consumer seeks extremely high risk, speculative or complex products which may have features such as significant use of derivatives, leverage or short positions or may be in emerging or niche asset classes (for example, crypto-assets or collectibles).</p>

Term	Definition
Consumer's need to access capital	
<p>This consumer attribute addresses the likely period of time between the making of a request for redemption/withdrawal (or access to investment proceeds more generally) and the receipt of proceeds from this request under ordinary circumstances. Issuers should consider both the frequency for accepting the request and the length of time to accept, process and distribute the proceeds of such a request. To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be taken into consideration in aligning the product to the consumer's need to access capital. Where a product is held on investment platforms, distributors also need to factor in the length of time platforms take to process requests for redemption for underlying investments. Where access to investment proceeds from the product is likely to occur through a secondary market, the liquidity of the market for the product should be considered.</p>	
Distributor Reporting	
Significant dealings	<p>Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning.</p> <p>The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.</p> <p>Dealings outside this TMD may be significant because:</p> <ul style="list-style-type: none"> • they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or • they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer). <p>In each case, the distributor should have regard to:</p> <ul style="list-style-type: none"> • the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes), • the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and • the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red or amber ratings attributed to the consumer). <p>Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:</p>

Term	Definition
	<ul style="list-style-type: none"> • it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the reporting quarter, • the consumer's intended product use is <i>Solution / Standalone</i>, • the consumer's intended product use is <i>Core component</i> or higher and the consumer's risk (ability to bear loss) and return profile is <i>Low</i>, or • the relevant product has a green rating for consumers seeking <i>extremely high</i> risk/return.
